**There is only one thing  
we can be sure of in  
life and that is the  
process of change**

Everything in our  
three dimensional  
material world  
eventually bows to its  
forces. Nothing stays  
the same and when  
the soul is ready to  
unfold more of its  
true nature, inevitably  
changes will occur.

Many changes are welcomed by us, especially if they lead to long held desires. However, sometimes changes need to take place that rock our sense of security and safety and we may find ourselves facing unwanted challenges and fighting against them.

It is natural for the personality to resist change, especially in areas in which we place our security, like money, relationships, career, business and whatever or whoever we think will give us our self worth. However all of these things are subject to change, so they are built on shaky ground. In these two workshops we will explore the concepts of change and security and how we can handle them both from a personal and spiritual perspective. Both workshops are complete within themselves so you can attend either. However, for the full understanding and experience it is highly recommended that if at all possible you attend both.

# Let the Planet Uranus Take Your Soul on a Ride to Freedom

*A one day workshop with astrologer Amy Bird and  
Soul Guidance Practitioner Christine King*

**Saturday 6th April. Held in Blackheath South East London**

**The planet Uranus is  
the great Cosmic Mover  
and Shaker**

Its aim is to bring about  
breakthroughs which  
ultimately free us from  
situations, patterns and  
behaviours that no  
longer serve us or the  
world. It does this by  
bringing about radical  
changes, both globally  
and within the  
individual

**On the 6th March 2019 Uranus entered Taurus** and will be there until 2025. Uranus is the Great Awakener. It's known as the rebellious planet that shakes things up. It governs electricity and lightning and moves swiftly in its determination to change old stagnant energies. Taurus on the other hand is a fixed sign and a totally different vibration to Uranus. Out of the 4 major Earth signs, it is the one most resistant to change as it likes to cling to the familiar and not upset the status quo.

However the fundamental rule of life is that all things need to change in order for us to evolve spiritually both personally and as a species

**Taurus governs the Earth herself.** It also governs material possessions, banking, money, self worth and everything in which we place our security. So Uranus travelling through Taurus will most likely affect these areas in us all.

**The additional piece of the Uranus puzzle** is to be found in your personal birth chart. We will look at the areas of *your life* that this transformational planet wants to help *you* to change, so that it can set you free from past limitations and move you further forward on your soul journey of Awakening.

# How to Place Your Future in the Hands of Your Inner Divine

*A step by step formula for trusting Life to guide, direct and support you in the midst of change and uncertainty*

Sunday 7th April in Blackheath South London SE3 9.45am to 5.30 pm

Image "Oracle" by Josephine Wall [www.josephinewall.co.uk](http://www.josephinewall.co.uk)

**During this workshop we will include the following subject matter**

Why placing our future in the hands of the Inner Divine works better

Why the soul creates change and how to handle it.

Material security versus spiritual security.

Why the pursuit of security makes us anxious

Money as a spiritual teacher versus "the root of all evil"!!

How to build trust that the Universe has our back

Why spiritual supply is much more than just money.

Relationships as spiritual teachers

Why no-one has the power to make us feel secure

Why nothing and no-one really belongs to us

Why our self worth can only come from knowing our Divine Self

This is a practical workshop where we will look at areas of your own life where changes may be occurring or may cause you concern on any level. You will leave with several transformational practices that you can start putting into practice immediately. This workshop is not an overnight fix but regular use of these tools can lead to amazing results.

## Order Form/ Details for Workshops on Saturday 6th and Sunday 7th April
