*Light Workers are souls who chose to incarnate at this time in order to make a significant impact on the Earth. They come to make a difference, both to their own spiritual evolution and the evolution of the planet. As they heal, humanity heals. This is a time of great change. A powerful shift in consciousness is taking place to enable the Divine Plan of the Universe to unfold. If you feel called to contribute to this transformation then you are probably an old soul.*

## *What is an Old Soul?*

Old souls have had numerous incarnations and experiences. They have encountered trials and tribulations and made many mistakes along the way but have also gathered a great deal of wisdom. They come to a point where just serving themselves and their own needs no longer satisfies them. This is generally the time when the soul calls them to become a vessel for the Light and to use those experiences to help others along the Path. Becoming a vessel for the Light has nothing to do with ego, sacrifice or deprivation. As we serve others, our life is expanded.

Old Souls are not superior or more special than anyone else and are certainly not perfect! They are simply allowing themselves to be used by the Light Within for Higher Purposes.
